

## **AUMA has moved!**

AUMA Actuators, Inc. has moved to a new manufacturing and headquarters building located at Southpointe in Washington County, Pennsylvania. It is a state-of –the–art actuator manufacturing plant of over 50,000 square feet.

AUMA is a manufacturer of electric motor actuators. The Company’s wide product range includes actuators for all types and sizes of valves and dampers. Recent technical enhancements include the introduction of non-intrusive actuators and the capability to interface with a variety of digital communication protocols. AUMA products are used in industrial facilities worldwide.

AUMA’s North American headquarters were founded in the Pittsburgh area in 1976. In 1980, the Company moved to its own building in Robinson Township, Allegheny County, Pennsylvania. That facility was expanded over the years as the Company grew. In 2002, the new property was purchased and remodeled to meet AUMA’s needs.
